# Advanced Manufacturing Innovation Training Course

Professional Development Training Course Outline

| | | | |
|---|---|---|---|
| **Category** | Manufacturing | **Duration** | 5 Days |
| **Base Fee** | $1,500 USD | **Delivery Mode** | Online / On-site Hybrid |

## Course Introduction

In today’s hyper-competitive industrial landscape, Advanced Manufacturing Innovation is redefining how organizations achieve digital transformation, smart factory integration, and operational excellence. Advanced Manufacturing Innovation Training Course is designed to equip professionals with cutting-edge knowledge in Industry 4.0 technologies, AI-driven production, robotics automation, and data-driven decision-making. By blending theoretical insights with real-world applications, participants will gain the ability to optimize production systems, enhance product quality, and accelerate innovation cycles using lean manufacturing, IoT-enabled systems, and predictive analytics.

As global industries transition toward sustainable manufacturing, intelligent supply chains, and cyber-physical systems, there is a growing demand for skilled professionals who can lead this transformation. This training provides a comprehensive framework for mastering digital twins, additive manufacturing, advanced materials, and smart automation strategies. Participants will leave with practical tools, strategic insights, and hands-on experience to drive innovation-led growth, cost optimization, and resilience in manufacturing ecosystems.

## Programme Curriculum

**Advanced Manufacturing Innovation Training Course**

**Introduction**

In today’s hyper-competitive industrial landscape, Advanced Manufacturing Innovation is redefining how organizations achieve digital transformation, smart factory integration, and operational excellence. Advanced Manufacturing Innovation Training Course is designed to equip professionals with cutting-edge knowledge in Industry 4.0 technologies, AI-driven production, robotics automation, and data-driven decision-making. By blending theoretical insights with real-world applications, participants will gain the ability to optimize production

systems, enhance product quality, and accelerate innovation cycles using lean manufacturing, IoT-enabled systems, and predictive analytics.

As global industries transition toward sustainable manufacturing, intelligent supply chains, and cyber-physical systems, there is a growing demand for skilled professionals who can lead this transformation. This training provides a comprehensive framework for mastering digital twins, additive manufacturing, advanced materials, and smart automation strategies. Participants will leave with practical tools, strategic insights, and hands-on experience to drive innovation-led growth, cost optimization, and resilience in manufacturing ecosystems.

**Course Duration**

5 days

**Course Objectives**

1. Develop expertise in Industry 4.0 and smart manufacturing ecosystems
2. Implement AI and machine learning in production optimization
3. Apply digital twin technology for real-time simulation and control
4. Master industrial IoT (IIoT) integration and connectivity solutions
5. Enhance efficiency using lean manufacturing and Six Sigma methodologies
6. Drive innovation through additive manufacturing (3D printing)
7. Utilize big data analytics for predictive maintenance
8. Strengthen cybersecurity in manufacturing systems
9. Optimize supply chain digitization and resilience strategies
10. Implement robotics process automation (RPA) and cobots
11. Advance sustainable and green manufacturing practices
12. Improve decision-making using real-time data visualization dashboards
13. Lead transformation with innovation management and agile methodologies

**Target Audience**

1. Manufacturing Engineers and Production Managers
2. Operations and Plant Managers
3. Industry 4.0 and Digital Transformation Leaders
4. Quality Assurance and Process Improvement Specialists
5. Supply Chain and Logistics Professionals
6. Automation and Robotics Engineers
7. R&D and Innovation Managers
8. Technical Consultants and Industrial Strategists

**Course Modules**

**Module 1: Industry 4.0 Foundations**

- Smart manufacturing concepts
- Cyber-physical systems
- Digital transformation roadmap
- Connected factory architecture
- Industrial automation trends
- **Case Study:** Smart factory implementation in automotive manufacturing

**Module 2: Industrial IoT (IIoT) & Connectivity**

- Sensor integration and data capture
- Edge computing in manufacturing
- Cloud-based manufacturing systems
- Real-time monitoring platforms
- IoT security frameworks
- **Case Study:** IoT-enabled predictive maintenance in heavy industry

**Module 3: Artificial Intelligence & Data Analytics**

- Machine learning for production
- Predictive analytics models
- Data-driven decision-making
- AI-based quality control
- Visualization dashboards
- **Case Study:** AI-powered defect detection in electronics manufacturing

**Module 4: Robotics & Automation**

- Industrial robots and cobots
- Process automation strategies
- Human-machine collaboration
- Autonomous production lines
- ROI of automation investments
- **Case Study:** Robotics integration in assembly line optimization

**Module 5: Additive Manufacturing & Advanced Materials**

- 3D printing technologies
- Rapid prototyping methods
- Smart materials innovation
- Design for additive manufacturing
- Cost-benefit analysis
- **Case Study:** Aerospace component production using additive manufacturing

**Module 6: Lean Manufacturing & Process Excellence**

- Lean principles and waste reduction
- Six Sigma methodologies
- Continuous improvement (Kaizen)
- Value stream mapping
- Operational efficiency tools
- **Case Study:** Lean transformation in FMCG manufacturing

**Module 7: Smart Supply Chain & Sustainability**

- Digital supply chain integration
- Blockchain in logistics
- Sustainable manufacturing practices
- Circular economy models
- Risk management strategies
- **Case Study:** Sustainable supply chain transformation in global retail

**Module 8: Innovation Strategy & Leadership**

- Innovation frameworks
- Agile project management
- Change management strategies
- Digital leadership skills
- Business model innovation
- **Case Study:** Organizational transformation through Industry 4.0 adoption

### Training Methodology

This course employs a participatory and hands-on approach to ensure practical learning, including:

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

**Register as a group from 3 participants for a Discount**

**Send us an email: info@fineskilltrainingcenter.org or call** *+254769199797*

***Certification***

*Upon successful completion of this training, participants will be issued with a globally- recognized certificate.*

***Tailor-Made Course***

*We also offer tailor-made courses based on your needs.*

**Key Notes**

**a.** The participant must be conversant with English.

**b.** Upon completion of training the participant will be issued with an Authorized Training Certificate

**c.** Course duration is flexible and the contents can be modified to fit any number of days.

**d.** The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

**e.** One-year post-training support Consultation and Coaching provided after the course.

**f.** Payment should be done at least a week before commence of the training, to Fineskill Training Center account, as indicated in the invoice so as to enable us prepare better for you.

## Upcoming Scheduled Sessions

| Start Date | End Date | Location | Price |
|---|---|---|---|
| **23 Nov 2026** | 27 Nov 2026 | Online | $1,000 |
| **23 Nov 2026** | 27 Nov 2026 | Physical | $1,500 |
| **23 Nov 2026** | 27 Nov 2026 | Physical | $3,000 |
| **23 Nov 2026** | 27 Nov 2026 | Physical | $3,000 |
| **23 Nov 2026** | 27 Nov 2026 | Physical | $6,000 |
| **23 Nov 2026** | 27 Nov 2026 | Physical | $4,500 |
| **23 Nov 2026** | 27 Nov 2026 | Physical | $6,000 |
| **23 Nov 2026** | 27 Nov 2026 | Physical | $6,000 |
