AI-Based Collection Development Training Course

Professional Development Training Course Outline

Category	Library Institute	**Duration**	5 Days
Base Fee	$1,500 USD	**Delivery Mode**	Online / On-site Hybrid

Course Introduction

AI-Based Collection Development Training Course provides a comprehensive understanding of how artificial intelligence technologies are transforming modern collection management, resource acquisition, and library information services. This advanced training course explores AI-driven collection analytics, predictive modeling, automated selection processes, digital resource optimization, and data-driven decision-making strategies. Participants will gain practical knowledge of integrating artificial intelligence, machine learning algorithms, and emerging technologies to enhance collection development workflows, improve user engagement, and maximize institutional resources.

The course focuses on developing future-ready collection development professionals who can leverage AI tools for evidence-based acquisitions, demand forecasting, content evaluation, and strategic resource planning. Through global case studies and practical applications, participants will learn how AI supports sustainable collection growth, improves operational efficiency, and enables organizations to create intelligent, user-centered information ecosystems.

Programme Curriculum

AI-Based Collection Development Training Course

Introduction

AI-Based Collection Development Training Course provides a comprehensive understanding of how artificial intelligence technologies are transforming modern collection management, resource acquisition, and library information services. This advanced training course explores AI-driven collection analytics, predictive modeling, automated selection processes, digital resource optimization, and data-driven decision-making strategies. Participants will gain practical knowledge of integrating artificial intelligence, machine learning algorithms, and emerging technologies to enhance collection development workflows, improve user engagement, and maximize institutional resources.

The course focuses on developing future-ready collection development professionals who can leverage AI tools for evidence-based acquisitions, demand forecasting, content evaluation, and strategic resource planning. Through global case studies and practical applications, participants will learn how AI supports sustainable collection growth, improves operational efficiency, and enables organizations to create intelligent, user-centered information ecosystems.

Course Objectives

By the end of this course, participants will be able to:

1. Understand AI fundamentals and their applications in modern collection development.
2. Develop AI-driven strategies for collection assessment and resource optimization.
3. Apply predictive analytics for improving acquisition and selection decisions.
4. Utilize machine learning tools for user behavior analysis and demand forecasting.
5. Implement automated workflows for efficient collection management.
6. Evaluate digital resources using AI-powered assessment techniques.
7. Apply data-driven decision-making approaches in collection planning.
8. Identify emerging AI technologies transforming library and information services.
9. Develop sustainable AI-based collection development frameworks.
10. Analyze global trends in intelligent resource management.
11. Improve collection performance through advanced analytics tools.
12. Manage ethical considerations in AI implementation.
13. Design innovative AI strategies for future collection development.

Organizational Benefits

- Improved accuracy in collection planning and resource acquisition decisions.
- Enhanced operational efficiency through AI automation.
- Better understanding of user information needs through analytics.
- Reduced costs through optimized resource allocation.
- Improved digital transformation capabilities.
- Enhanced decision-making using real-time data insights.
- Stronger institutional competitiveness through innovation.
- Increased accessibility and discoverability of resources.
- Improved strategic planning and forecasting.
- Development of AI-ready professionals.

Target Audiences

1. Librarians and information professionals.
2. Collection development managers.
3. Academic and research institution administrators.
4. Digital resource specialists.
5. Knowledge management professionals.
6. Library technology professionals.
7. Information science educators.

8. Records and content management specialists.

Course Duration: 5 days

Course Modules

Module 1: Introduction to AI in Collection Development

- Fundamentals of artificial intelligence and machine learning in collection management.
- Role of AI in transforming traditional acquisition and evaluation processes.
- AI-powered tools for modern information resource management.
- Benefits and challenges of AI adoption in libraries.
- Global case study: AI implementation strategies at leading international academic libraries.
- Future trends shaping intelligent collection development ecosystems.

Module 2: AI-Based Collection Assessment and Analytics

- Application of AI analytics for collection performance evaluation.
- Using data intelligence to identify resource gaps and opportunities.
- Automated analysis of usage patterns and user preferences.
- AI-supported decision frameworks for collection improvement.
- Global case study: Predictive collection analytics used by research institutions.
- Developing measurable AI-based collection assessment strategies.

Module 3: Predictive Analytics and Demand Forecasting

- Understanding predictive models for collection planning.
- Using AI algorithms to forecast future information needs.
- Analyzing historical data for acquisition decisions.
- Improving budget allocation through predictive insights.
- Global case study: AI forecasting systems in university libraries.
- Implementing data-driven collection development models.

Module 4: AI Tools for Resource Selection and Acquisition

- AI applications in automated resource discovery.
- Intelligent recommendation systems for acquisitions.
- Evaluating digital content using AI technologies.
- Improving vendor selection through data analytics.
- Global case study: Automated acquisition platforms in global libraries.
- Managing AI-assisted procurement workflows.

Module 5: Machine Learning for User Behavior Analysis

- Understanding user interaction patterns through AI.
- Applying machine learning for personalized recommendations.
- Analyzing search behaviors and information preferences.
- Improving user experience through intelligent systems.
- Global case study: AI recommendation engines in digital libraries.
- Developing user-centered collection strategies.

Module 6: AI Ethics, Governance, and Data Management

- Ethical principles for AI adoption in collection development.
- Managing privacy and security challenges.
- Ensuring transparency in AI-generated recommendations.
- Developing responsible AI governance frameworks.
- Global case study: Ethical AI policies in international information organizations.
- Creating sustainable AI management practices.

Module 7: Digital Transformation and Future Collection Strategies

- Integrating AI into digital collection development frameworks.
- Managing emerging technologies and intelligent platforms.
- Building future-ready information services.
- Enhancing accessibility through AI solutions.
- Global case study: Digital transformation initiatives in leading libraries.
- Designing innovative AI collection development roadmaps.

Module 8: Practical Implementation of AI Collection Development

- Developing AI adoption plans for organizations.
- Selecting appropriate AI tools and technologies.
- Measuring AI implementation outcomes.
- Managing organizational change during AI transformation.
- Global case study: Successful AI-driven collection modernization projects.
- Creating personalized AI collection development action plans.

Training Methodology

- Interactive instructor-led presentations covering AI concepts and applications.
- Practical demonstrations of AI-based collection development tools.
- Group discussions focusing on real-world challenges and solutions.

- Global case study analysis from leading information organizations.
- Hands-on exercises involving AI analytics and decision-making processes.
- Collaborative workshops for developing AI implementation strategies.

Register as a group from 3 participants for a Discount

Send us an email: info@fineskilltrainingcenter.org or call *+254769199797*

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

a. The participant must be conversant with English.

b. Upon completion of training the participant will be issued with an Authorized Training Certificate

c. Course duration is flexible and the contents can be modified to fit any number of days.

d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

e. One-year post-training support Consultation and Coaching provided after the course.

f. Payment should be done at least a week before commence of the training, to Fineskill Training Center account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
23 Nov 2026	27 Nov 2026	Online	$1,000
23 Nov 2026	27 Nov 2026	Physical	$1,500
23 Nov 2026	27 Nov 2026	Physical	$3,000
23 Nov 2026	27 Nov 2026	Physical	$3,000

Start Date	End Date	Location	Price
23 Nov 2026	27 Nov 2026	Physical	$6,000
23 Nov 2026	27 Nov 2026	Physical	$4,500
23 Nov 2026	27 Nov 2026	Physical	$6,000
23 Nov 2026	27 Nov 2026	Physical	$6,000
