

AI-Driven Literature Reviews Training Course

Professional Development Training Course Outline

Category	Research and Data Analysis	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

In the rapidly evolving research landscape, mastering AI-driven literature reviews is becoming essential for academics, professionals, and organizations seeking a competitive edge. Leveraging artificial intelligence, natural language processing (NLP), and machine learning, researchers can now automate and accelerate literature screening, data extraction, and synthesis, dramatically enhancing the efficiency and accuracy of systematic reviews. AI-Driven Literature Reviews Training Course equips participants with cutting-edge AI tools, text mining techniques, and semantic analysis, enabling them to identify trends, gaps, and insights across vast academic and industry publications.

Our course combines hands-on workshops, real-world case studies, and practical applications, ensuring participants gain actionable skills to streamline their research workflow. From beginners to advanced users, attendees will learn to harness AI-powered tools for data curation, knowledge mapping, and predictive analytics, transforming traditional literature reviews into dynamic, data-driven insights. By integrating automation, scalability, and precision, this training empowers researchers, data analysts, and decision-makers to make informed, evidence-based strategies faster than ever before.

Programme Curriculum

AI-Driven Literature Reviews Training Course

Introduction

In the rapidly evolving research landscape, mastering AI-driven literature reviews is becoming essential for academics, professionals, and organizations seeking a competitive edge. Leveraging artificial intelligence, natural language processing (NLP), and machine learning, researchers can now automate and accelerate literature screening, data extraction, and synthesis, dramatically enhancing the efficiency and accuracy of systematic reviews. AI-Driven Literature Reviews Training Course equips participants with cutting-edge AI tools,

text mining techniques, and semantic analysis, enabling them to identify trends, gaps, and insights across vast academic and industry publications.

Our course combines hands-on workshops, real-world case studies, and practical applications, ensuring participants gain actionable skills to streamline their research workflow. From beginners to advanced users, attendees will learn to harness AI-powered tools for data curation, knowledge mapping, and predictive analytics, transforming traditional literature reviews into dynamic, data-driven insights. By integrating automation, scalability, and precision, this training empowers researchers, data analysts, and decision-makers to make informed, evidence-based strategies faster than ever before.

Course Duration

5 days

Course Objectives

Participants will be able to:

1. Understand the fundamentals of AI and machine learning in literature reviews.
2. Implement natural language processing (NLP) techniques for text mining.
3. Automate systematic literature searches across multiple databases.
4. Conduct semantic analysis to identify trends and research gaps.
5. Apply predictive analytics to forecast emerging research areas.
6. Utilize knowledge mapping and visualization tools for review synthesis.
7. Ensure data integrity and reproducibility in AI-assisted reviews.
8. Integrate cloud-based AI platforms for collaborative research.
9. Optimize workflow efficiency using AI automation.
10. Evaluate and select the best AI tools for literature management.
11. Interpret quantitative and qualitative insights from AI analyses.
12. Build AI-powered dashboards for research reporting.
13. Develop strategies for AI-augmented decision-making in research planning.

Target Audience

1. Academic researchers and PhD scholars
2. Data scientists and AI practitioners
3. Research analysts in corporate or government sectors
4. Librarians and information specialists
5. Graduate students in STEM, social sciences, and healthcare
6. Policy makers and consultants needing evidence synthesis
7. Knowledge management professionals
8. Professionals involved in **systematic reviews and meta-analyses**

Course Modules

Module 1: Introduction to AI in Literature Reviews

- Overview of AI, ML, and NLP in research
- Traditional vs AI-driven literature reviews
- Key AI platforms and software
- Ethical considerations in AI research
- **Case Study:** AI-assisted review in COVID-19 publications

Module 2: Literature Search Automation

- Database selection and search strategies
- Automated keyword extraction and query optimization
- Integration of AI with academic databases
- Handling large-scale publication data
- **Case Study:** Automating PubMed and Scopus searches

Module 3: Text Mining and NLP Techniques

- Tokenization, stemming, and lemmatization
- Named entity recognition (NER) for research topics
- Sentiment and semantic analysis
- Trend detection across publications
- **Case Study:** Mining AI publications for emerging trends

Module 4: Systematic Review Automation

- PRISMA and AI-assisted workflows
- Inclusion/exclusion criteria automation
- Duplicate removal and metadata cleaning
- AI-assisted screening prioritization
- **Case Study:** Streamlining clinical trial reviews

Module 5: Knowledge Mapping and Visualization

- Concept mapping and co-citation analysis
- Network visualization with AI tools
- Clustering and thematic mapping
- Data dashboards for insights
- **Case Study:** Visualizing collaboration networks in oncology research

Module 6: Predictive Analytics in Literature Reviews

- Forecasting research trends
- Citation impact prediction
- Topic modeling for emerging areas
- Risk and gap analysis
- **Case Study:** Predicting future AI research hotspots

Module 7: Data Integrity and Reproducibility

- Ensuring data quality and consistency
- Transparent AI workflows
- Reproducible research practices
- Audit trails and version control
- **Case Study:** Reproducing a systematic review using AI

Module 8: Practical Implementation Workshop

- Hands-on AI tool exercises
- Building AI dashboards

- Collaborative project: full AI-driven review
- Troubleshooting and best practices
- **Case Study:** End-to-end AI-assisted review on renewable energy research

Training Methodology

This course employs a participatory and hands-on approach to ensure practical learning, including:

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

Register as a group from 3 participants for a Discount

Send us an email: info@fineskilltrainingcenter.org or call +254769199797

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- The participant must be conversant with English.
- Upon completion of training the participant will be issued with an Authorized Training Certificate
- Course duration is flexible and the contents can be modified to fit any number of days.
- The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- One-year post-training support Consultation and Coaching provided after the course.
- Payment should be done at least a week before commence of the training, to Fineskill Training Center account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
21 Sep 2026	25 Sep 2026	Online	\$1,000
21 Sep 2026	25 Sep 2026	Physical	\$1,500
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
