# Airport Air Quality Management Training Course

Professional Development Training Course Outline

| | | | |
|---|---|---|---|
| **Category** | Aviation and Airport Management | **Duration** | 5 Days |
| **Base Fee** | $1,500 USD | **Delivery Mode** | Online / On-site Hybrid |

## Course Introduction

Airport Air Quality Management Training Course is designed to enhance knowledge and capabilities in managing air pollution, emissions control, environmental compliance, and sustainable airport operations. With the rapid growth of global aviation, airports face increasing challenges related to aircraft emissions, ground support equipment pollution, carbon management, indoor air quality, and regulatory requirements. This course provides aviation professionals with advanced strategies, innovative technologies, and best practices for achieving cleaner air environments while supporting airport sustainability goals.

The course integrates global aviation environmental standards, air quality monitoring techniques, emission reduction strategies, climate action initiatives, and smart airport management approaches. Participants will explore international case studies, emerging green aviation technologies, and practical solutions used by leading airports worldwide. The training equips professionals with the skills required to develop effective air quality management systems, improve environmental performance, and contribute to healthier communities around airport ecosystems.

## Programme Curriculum

**Airport Air Quality Management Training Course**

**Introduction**

Airport Air Quality Management Training Course is designed to enhance knowledge and capabilities in managing air pollution, emissions control, environmental compliance, and sustainable airport operations. With the rapid growth of global aviation, airports face increasing challenges related to aircraft emissions, ground support equipment pollution, carbon management, indoor air quality, and regulatory requirements. This course provides aviation professionals with advanced strategies, innovative technologies, and best practices for achieving cleaner air environments while supporting airport sustainability goals.

The course integrates global aviation environmental standards, air quality monitoring techniques, emission reduction strategies, climate action initiatives, and smart airport management approaches. Participants will explore international case studies, emerging green aviation technologies, and practical solutions used by leading airports worldwide. The training equips professionals with the skills required to develop effective air quality management systems, improve environmental performance, and contribute to healthier communities around airport ecosystems.

**Course Objectives**

1. Develop advanced knowledge of airport air quality management principles and environmental sustainability practices.
2. Understand global aviation emission trends, climate policies, and carbon reduction strategies.
3. Apply modern air quality monitoring technologies and data analytics for airport environments.
4. Identify major sources of airport-related air pollution and mitigation opportunities.
5. Implement effective emission control programs for aircraft, vehicles, and airport facilities.
6. Understand international aviation environmental regulations and compliance frameworks.
7. Develop sustainable airport strategies aligned with green aviation initiatives.
8. Analyze air quality risks using environmental assessment methodologies.
9. Improve operational efficiency through clean technology adoption.
10. Enhance skills in environmental reporting, auditing, and performance measurement.
11. Develop strategies for reducing carbon footprint and improving airport resilience.
12. Apply innovative solutions for sustainable ground operations management.
13. Strengthen decision-making capabilities in airport environmental governance.

**Organizational Benefits**

1. Improved compliance with international aviation environmental standards.
2. Reduced airport emissions and enhanced sustainability performance.
3. Better management of environmental risks and operational challenges.
4. Enhanced reputation through green airport initiatives.
5. Improved employee awareness of air quality protection practices.
6. Increased efficiency through cleaner technologies and optimized operations.
7. Stronger community relations through reduced environmental impacts.
8. Improved reporting and environmental performance monitoring.
9. Enhanced capability to achieve carbon reduction targets.
10. Better preparation for future aviation environmental regulations.

**Target Audiences**

1. Airport environmental managers and sustainability officers.
2. Airport operations managers and supervisors.
3. Aviation regulatory authorities and government agencies.
4. Airline environmental and sustainability professionals.
5. Airport engineers and infrastructure specialists.
6. Ground handling companies and service providers.
7. Environmental consultants and researchers.

8. Aviation safety and compliance professionals.

**Course Duration:** 5 days

**Course Modules**

**Module 1: Fundamentals of Airport Air Quality Management**

- Understanding airport air quality challenges and environmental impacts.
- Overview of aviation pollution sources and emission characteristics.
- Introduction to air quality management systems and frameworks.
- Exploring international airport environmental management practices.
- Case study: London Heathrow Airport air quality improvement initiatives.
- Developing awareness of sustainable airport environmental strategies.

**Module 2: Airport Emission Sources and Impact Assessment**

- Identifying aircraft engine emissions and operational impacts.
- Assessing ground support equipment pollution sources.
- Evaluating airport construction and infrastructure-related emissions.
- Understanding local community exposure to airport pollutants.
- Case study: Los Angeles International Airport emission reduction programs.
- Applying emission assessment techniques for airport environments.

**Module 3: Air Quality Monitoring Technologies and Data Analytics**

- Understanding air monitoring equipment and sensor technologies.
- Applying real-time air quality data collection methods.
- Using digital platforms for environmental monitoring.
- Interpreting air pollution measurements and performance indicators.
- Case study: Amsterdam Schiphol Airport smart monitoring systems.
- Developing data-driven air quality improvement strategies.

**Module 4: Aircraft Emission Reduction Strategies**

- Exploring aircraft engine efficiency improvement technologies.
- Understanding sustainable aviation fuel contribution to cleaner air.
- Implementing aircraft operational emission reduction measures.
- Evaluating taxiing and aircraft movement optimization.
- Case study: Singapore Changi Airport aircraft emission initiatives.
- Developing aircraft-related pollution mitigation plans.

**Module 5: Ground Operations and Vehicle Emission Management**

- Managing emissions from airport ground support equipment.
- Implementing electric and hybrid vehicle solutions.
- Optimizing ground transportation systems.
- Improving fuel efficiency in airport operations.
- Case study: Oslo Airport electric ground operations model.
- Designing cleaner ground handling strategies.

**Module 6: Indoor Air Quality Management in Airports**

- Understanding passenger terminal air quality requirements.
- Managing ventilation and filtration systems.
- Controlling indoor pollutants and health risks.
- Applying smart building technologies for air improvement.
- Case study: Hong Kong International Airport indoor air management.
- Developing effective indoor air quality programs.

**Module 7: Environmental Regulations and Compliance Management**

- Understanding ICAO environmental standards and guidelines.
- Reviewing national and international air quality regulations.
- Implementing environmental auditing procedures.
- Managing airport environmental documentation and reporting.
- Case study: European airport compliance frameworks.
- Strengthening regulatory compliance capabilities.

**Module 8: Sustainable Airport Air Quality Strategy Development**

- Developing long-term airport air quality improvement plans.
- Integrating renewable energy and green technologies.
- Establishing environmental performance indicators.
- Creating stakeholder engagement strategies.
- Case study: San Francisco International Airport sustainability program.
- Building future-ready sustainable airport operations.

**Training Methodology**

- Interactive instructor-led presentations covering airport air quality concepts and global practices.
- Practical workshops focusing on emission assessment and environmental management techniques.
- Group discussions analyzing aviation sustainability challenges and solutions.

- Real-world case studies from international airports and aviation organizations.
- Simulation exercises for developing airport air quality improvement strategies.
- Collaborative activities promoting knowledge sharing and professional networking.

**Register as a group from 3 participants for a Discount**

**Send us an email: info@fineskilltrainingcenter.org or call *+254769199797***

*Certification*

*Upon successful completion of this training, participants will be issued with a globally- recognized certificate.*

*Tailor-Made Course*

*We also offer tailor-made courses based on your needs.*

Key Notes

a. The participant must be conversant with English.

b. Upon completion of training the participant will be issued with an Authorized Training Certificate

c. Course duration is flexible and the contents can be modified to fit any number of days.

d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

e. One-year post-training support Consultation and Coaching provided after the course.
f. Payment should be done at least a week before commence of the training, to Fineskill Training Center account, as indicated in the invoice so as to enable us prepare better for you.

## Upcoming Scheduled Sessions

| Start Date | End Date | Location | Price |
|---|---|---|---|
| **23 Nov 2026** | 27 Nov 2026 | Online | $1,000 |
| **23 Nov 2026** | 27 Nov 2026 | Physical | $1,500 |
| **23 Nov 2026** | 27 Nov 2026 | Physical | $3,000 |
| **23 Nov 2026** | 27 Nov 2026 | Physical | $3,000 |
| **23 Nov 2026** | 27 Nov 2026 | Physical | $6,000 |

| Start Date | End Date | Location | Price |
|---|---|---|---|
| **23 Nov 2026** | 27 Nov 2026 | Physical | $4,500 |
| **23 Nov 2026** | 27 Nov 2026 | Physical | $6,000 |
| **23 Nov 2026** | 27 Nov 2026 | Physical | $6,000 |
