Course Introduction

Camp Management for Displaced Persons Training Course is designed to equip humanitarian workers, government officials, and relief organizations with the knowledge and practical skills necessary for managing camps effectively in crisis and emergency situations. With global displacement rates increasing due to conflict, climate change, and natural disasters, effective camp management has become a critical humanitarian response tool. This course integrates the latest humanitarian response frameworks, international protection standards, and evidence-based approaches to address the needs of displaced persons.

By combining theoretical insights with practical case studies, participants will gain a comprehensive understanding of camp coordination, humanitarian logistics, community participation, protection mechanisms, and accountability systems. The training ensures that learners acquire the technical skills required to manage displaced populations with dignity, safety, and resilience, while also aligning with global humanitarian best practices and Sustainable Development Goals.
