Credit Portfolio Management Training Course

Professional Development Training Course Outline

Category	ACCOUNTING & FINANCE	**Duration**	5 Days
Base Fee	$1,500 USD	**Delivery Mode**	Online / On-site Hybrid

Course Introduction

Credit Portfolio Management Training is a specialized financial program designed to equip professionals with advanced skills in credit risk analysis, portfolio optimization, and strategic lending decisions. In today's dynamic banking and financial services industry, effective credit portfolio management is essential for minimizing default risk, improving asset quality, and maximizing profitability. Credit Portfolio Management Training Course integrates modern credit risk frameworks, regulatory compliance standards, and data-driven decision-making tools used in global financial markets.

The training also focuses on strengthening institutional resilience through robust credit monitoring systems, diversification strategies, and stress testing techniques. Participants will gain deep insights into credit lifecycle management, non-performing loan (NPL) reduction strategies, and portfolio performance enhancement using globally accepted financial models and best practices.

Programme Curriculum

Credit Portfolio Management Training Course

Introduction

Credit Portfolio Management Training is a specialized financial program designed to equip professionals with advanced skills in credit risk analysis, portfolio optimization, and strategic lending decisions. In today's dynamic banking and financial services industry, effective credit portfolio management is essential for minimizing default risk, improving asset quality, and maximizing profitability. Credit Portfolio Management Training Course integrates modern credit risk frameworks, regulatory compliance standards, and data-driven decision-making tools used in global financial markets.

The training also focuses on strengthening institutional resilience through robust credit monitoring systems, diversification strategies, and stress testing techniques. Participants will gain deep insights into credit lifecycle

management, non-performing loan (NPL) reduction strategies, and portfolio performance enhancement using globally accepted financial models and best practices.

Course Objectives

1. Master credit portfolio management strategies for banking and financial institutions
2. Understand advanced credit risk assessment and mitigation techniques
3. Apply portfolio diversification models to reduce default exposure
4. Analyze loan performance using data-driven credit analytics tools
5. Implement Basel III and Basel IV regulatory compliance frameworks
6. Develop effective non-performing loan (NPL) management strategies
7. Optimize credit allocation for improved profitability and risk balance
8. Strengthen decision-making using credit scoring and rating systems
9. Integrate ESG (Environmental, Social, Governance) factors in credit decisions
10. Enhance stress testing and scenario analysis capabilities
11. Improve credit monitoring and early warning systems
12. Build strategic credit restructuring and recovery frameworks
13. Leverage fintech and AI-driven credit portfolio management solutions

Organizational Benefits

- Improved credit risk control and reduced loan default rates
- Enhanced profitability through optimized credit allocation
- Stronger compliance with global banking regulations
- Better financial forecasting and portfolio stability
- Increased efficiency in loan approval and monitoring processes
- Reduced exposure to non-performing loans (NPLs)
- Strengthened decision-making through analytics and AI tools
- Improved investor and stakeholder confidence
- Enhanced liquidity and capital adequacy management
- Competitive advantage in financial markets

Target Audiences

- Credit analysts and risk managers
- Bank lending officers and loan portfolio managers
- Financial analysts and investment managers
- Corporate finance professionals
- Central bank and regulatory staff
- Accounting and audit professionals
- Fintech and credit scoring specialists
- MBA finance students and researchers

Course Duration: 5 days

Course Modules
