Data Apps Development Training Course

Professional Development Training Course Outline

Category	Business Intelligence	**Duration**	5 Days
Base Fee	$1,500 USD	**Delivery Mode**	Online / On-site Hybrid

Course Introduction

Data Apps Development Training Course is designed to equip professionals with advanced skills in building scalable, secure, and efficient data-driven applications. Participants will gain hands-on experience in the latest development frameworks, cloud integrations, and database management techniques. This course emphasizes real-world applications, ensuring that learners can apply their knowledge immediately in professional settings. By combining practical exercises with theoretical knowledge, this training ensures a comprehensive understanding of data applications from conception to deployment.

As organizations increasingly rely on data to drive business decisions, expertise in data apps development has become essential. This course focuses on trending tools, cutting-edge technologies, and industry best practices to empower participants with the ability to create innovative solutions. By the end of this training, participants will master data integration, automation, analytics, and application performance optimization, making them highly valuable in modern data-driven enterprises.

Programme Curriculum

Data Apps Development Training Course

Introduction

Data Apps Development Training Course is designed to equip professionals with advanced skills in building scalable, secure, and efficient data-driven applications. Participants will gain hands-on experience in the latest development frameworks, cloud integrations, and database management techniques. This course emphasizes real-world applications, ensuring that learners can apply their knowledge immediately in professional settings. By combining practical exercises with theoretical knowledge, this training ensures a comprehensive understanding of data applications from conception to deployment.

As organizations increasingly rely on data to drive business decisions, expertise in data apps development has become essential. This course focuses on trending tools, cutting-edge technologies, and industry best practices

to empower participants with the ability to create innovative solutions. By the end of this training, participants will master data integration, automation, analytics, and application performance optimization, making them highly valuable in modern data-driven enterprises.

Course Objectives

1. Develop scalable data applications using modern programming frameworks.
2. Integrate cloud services for efficient data storage and processing.
3. Implement secure authentication and authorization protocols.
4. Optimize application performance through effective database management.
5. Utilize APIs and microservices for seamless data integration.
6. Apply data visualization techniques to enhance decision-making.
7. Implement real-time data processing and analytics.
8. Develop responsive user interfaces for data-centric applications.
9. Apply DevOps practices for continuous integration and deployment.
10. Ensure compliance with data privacy regulations and standards.
11. Leverage machine learning and AI integration within apps.
12. Build robust error handling and logging mechanisms.
13. Enhance teamwork and collaboration in agile development environments.

Organizational Benefits

- Faster delivery of data-driven solutions
- Improved application security and compliance
- Enhanced data management and reporting efficiency
- Reduced operational costs through optimized apps
- Better decision-making using real-time analytics
- Increased team productivity and collaboration
- Scalable solutions supporting business growth
- Competitive advantage through innovation
- Streamlined integration with existing systems
- Enhanced customer experience via responsive applications

Target Audiences

- Software developers and engineers
- Data analysts and data engineers
- IT project managers
- Business intelligence professionals
- Cloud solution architects
- QA and testing professionals
- System administrators
- Technology consultants

Course Duration: 5 days

Course Modules

Module 1: Introduction to Data Apps Development

- Overview of data application lifecycle

- Key technologies and frameworks
- Data architecture fundamentals
- Cloud vs on-premise development
- Security considerations in data apps
- Case Study: Developing a small-scale inventory management app

Module 2: Programming for Data Apps

- Core programming languages (Python, JavaScript, Java)
- Writing clean and maintainable code
- Version control with Git
- Error handling and debugging
- Automated testing basics
- Case Study: Building a data collection tool

Module 3: Database Design & Management

- Relational vs non-relational databases
- Data modeling and normalization
- Indexing and query optimization
- Backup and recovery strategies
- Performance tuning techniques
- Case Study: Designing a customer analytics database

Module 4: API & Microservices Integration

- RESTful APIs fundamentals
- Microservices architecture
- Data exchange formats (JSON, XML)
- Securing API endpoints
- API versioning and documentation
- Case Study: Integrating a payment gateway API

Module 5: Data Visualization & Reporting

- Visualization tools and libraries
- Creating dashboards and reports
- Interactive charts and graphs
- User experience in data apps
- Data storytelling techniques
- Case Study: Visualizing sales performance data

Module 6: Cloud Integration & Deployment

- Cloud service models (IaaS, PaaS, SaaS)
- Deploying apps on cloud platforms
- Containerization with Docker
- Continuous integration and delivery
- Scaling applications on demand
- Case Study: Migrating an on-premise app to the cloud

Module 7: Real-Time Analytics & Processing

- Stream processing concepts
- Message queues and brokers
- Data pipelines and ETL processes
- Monitoring and logging
- Performance optimization in real-time apps
- Case Study: Building a live analytics dashboard

Module 8: Advanced Topics & Emerging Trends

- AI and ML integration
- Predictive analytics in apps
- IoT data application integration
- Security best practices and GDPR compliance
- Future trends in data app development
- Case Study: Predictive maintenance application

Training Methodology

- Interactive lectures with real-world examples
- Hands-on labs for practical experience
- Group exercises to foster collaboration
- Case studies to apply concepts in realistic scenarios
- Continuous assessments and feedback
- Mentorship and Q&A sessions throughout the course

Register as a group from 3 participants for a Discount

Send us an email: info@fineskilltrainingcenter.org or call *+254769199797*

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

a. The participant must be conversant with English.

b. Upon completion of training the participant will be issued with an Authorized Training Certificate

c. Course duration is flexible and the contents can be modified to fit any number of days.

d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

e. One-year post-training support Consultation and Coaching provided after the course.

f. Payment should be done at least a week before commence of the training, to Fineskill Training Center account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
23 Nov 2026	27 Nov 2026	Online	$1,000
23 Nov 2026	27 Nov 2026	Physical	$1,500
23 Nov 2026	27 Nov 2026	Physical	$3,000
23 Nov 2026	27 Nov 2026	Physical	$3,000
23 Nov 2026	27 Nov 2026	Physical	$6,000
23 Nov 2026	27 Nov 2026	Physical	$4,500
23 Nov 2026	27 Nov 2026	Physical	$6,000
23 Nov 2026	27 Nov 2026	Physical	$6,000
