

Data Governance for Non-Tech Leaders Training Course

Professional Development Training Course Outline

Category	Corporate Governance	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

In today’s data-driven business environment, organizations are increasingly reliant on accurate, secure, and compliant data management practices. Data Governance for Non-Tech Leaders Training Course equips executives, managers, and decision-makers with the essential knowledge to understand, oversee, and implement effective data governance frameworks without requiring technical expertise. Participants will explore the critical components of data quality, data security, regulatory compliance, and ethical management, ensuring that organizational data serves as a strategic asset to drive business growth, innovation, and operational efficiency.

This course emphasizes practical strategies and leadership-driven decision-making for non-technical professionals. Participants will gain insights into defining data ownership, establishing accountability, mitigating risks, and creating a culture of data responsibility across departments. By blending real-world case studies with interactive exercises, the training ensures that attendees leave with actionable skills to enhance data integrity, support regulatory requirements, and improve overall organizational performance. Strong trending keywords integrated into the content include data strategy, compliance, risk management, operational efficiency, and decision-making.

Programme Curriculum

Data Governance for Non-Tech Leaders Training Course

Introduction

In today’s data-driven business environment, organizations are increasingly reliant on accurate, secure, and compliant data management practices. Data Governance for Non-Tech Leaders Training Course equips executives, managers, and decision-makers with the essential knowledge to understand, oversee, and implement effective data governance frameworks without requiring technical expertise. Participants will explore

the critical components of data quality, data security, regulatory compliance, and ethical management, ensuring that organizational data serves as a strategic asset to drive business growth, innovation, and operational efficiency.

This course emphasizes practical strategies and leadership-driven decision-making for non-technical professionals. Participants will gain insights into defining data ownership, establishing accountability, mitigating risks, and creating a culture of data responsibility across departments. By blending real-world case studies with interactive exercises, the training ensures that attendees leave with actionable skills to enhance data integrity, support regulatory requirements, and improve overall organizational performance. Strong trending keywords integrated into the content include data strategy, compliance, risk management, operational efficiency, and decision-making.

Course Objectives

1. Understand the fundamentals of data governance and its business value
2. Recognize the roles and responsibilities of data stewards and data owners
3. Implement strategies to ensure data quality and consistency across the organization
4. Develop policies for secure and compliant data management
5. Mitigate data-related risks and strengthen organizational resilience
6. Navigate data privacy regulations including GDPR, CCPA, and HIPAA
7. Establish accountability frameworks for cross-departmental data usage
8. Integrate data governance into overall corporate strategy and decision-making
9. Promote a data-driven culture across non-technical teams
10. Apply ethical principles to data collection, storage, and sharing
11. Evaluate tools and platforms to support governance initiatives
12. Conduct data audits and continuous monitoring for compliance
13. Analyze case studies to understand best practices in industry-leading organizations

Organizational Benefits

- Enhanced data quality and reliability for strategic decisions
- Stronger compliance with regulatory requirements
- Improved cross-functional collaboration and accountability
- Risk reduction in data handling and reporting
- Streamlined data processes to reduce operational inefficiencies
- Increased trust in organizational data assets
- Better alignment between business strategy and data initiatives
- Cost savings through effective data management
- Improved data-driven innovation and competitive advantage
- Strengthened corporate reputation through responsible data practices

Target Audiences

1. Business executives and C-level leaders
2. Department heads and managers
3. Compliance officers

4. Risk management professionals
5. Project managers overseeing data initiatives
6. Operations managers
7. Non-technical IT coordinators
8. Consultants and advisors in business strategy

Course Duration: 5 days
