Ethics in Global Health Training Course

Professional Development Training Course Outline

Category	Public Health	**Duration**	5 Days
Base Fee	$1,500 USD	**Delivery Mode**	Online / On-site Hybrid

Course Introduction

Ethics in global health has become a critical cornerstone of modern healthcare systems, especially in an era shaped by pandemics, digital health transformation, health equity gaps, climate change impacts, and cross-border medical collaboration. Ethics in Global Health Training Course provides a comprehensive framework for understanding bioethics, global health governance, human rights in healthcare, and equitable access to medical resources. It is designed to equip learners with the competencies needed to navigate complex ethical dilemmas in international health policy, humanitarian emergencies, clinical research, and global disease control systems.

In today's interconnected world, challenges such as vaccine equity, data privacy in digital health, AI-driven healthcare decision-making, migrant health rights, and ethical clinical trials in low-resource settings demand highly skilled professionals with strong ethical reasoning. This course integrates real-world case studies, global policy frameworks (WHO guidelines, SDGs, and international health regulations), and practical ethical decision-making models to prepare participants for leadership roles in global health systems. It emphasizes responsible innovation, cultural sensitivity, and justice-centered healthcare delivery.

Programme Curriculum

Ethics in Global Health Training Course

Introduction

Ethics in global health has become a critical cornerstone of modern healthcare systems, especially in an era shaped by pandemics, digital health transformation, health equity gaps, climate change impacts, and cross-border medical collaboration. Ethics in Global Health Training Course provides a comprehensive framework for understanding bioethics, global health governance, human rights in healthcare, and equitable access to medical resources. It is designed to equip learners with the competencies needed to navigate complex ethical dilemmas in international health policy, humanitarian emergencies, clinical research, and global disease control systems.

In today's interconnected world, challenges such as vaccine equity, data privacy in digital health, AI-driven healthcare decision-making, migrant health rights, and ethical clinical trials in low-resource settings demand highly skilled professionals with strong ethical reasoning. This course integrates real-world case studies, global policy frameworks (WHO guidelines, SDGs, and international health regulations), and practical ethical decision-making models to prepare participants for leadership roles in global health systems. It emphasizes responsible innovation, cultural sensitivity, and justice-centered healthcare delivery.

Course Duration

5 days

Course Objectives

1. Understand global health ethics frameworks and international standards
2. Analyze health equity and social justice in healthcare systems
3. Evaluate AI ethics in healthcare decision-making
4. Apply principles of bioethics in clinical and research settings
5. Assess vaccine distribution ethics and global equity challenges
6. Understand data privacy and digital health ethics (health informatics governance)
7. Examine human rights-based approaches to global healthcare
8. Address ethical issues in humanitarian emergencies and disaster response
9. Evaluate clinical trial ethics in low- and middle-income countries (LMICs)
10. Understand climate change and environmental health ethics
11. Apply culturally competent healthcare delivery principles
12. Develop skills in ethical leadership in global health systems
13. Critically assess health policy ethics under WHO and SDG frameworks

Target Audience

1. Public health professionals
2. Medical doctors and clinicians
3. Nurses and midwives
4. Health policy makers and government officials
5. NGO and humanitarian workers
6. Medical and public health students
7. Health researchers and epidemiologists
8. Global health consultants and advisors

Course Modules

Module 1: Foundations of Global Health Ethics

- Principles of bioethics: autonomy, justice, beneficence, non-maleficence
- Global ethical frameworks (WHO, UNESCO guidelines)
- Ethical reasoning models in healthcare
- Cross-cultural ethics in global health systems
- **Case Study:** Ebola outbreak response ethical challenges in West Africa

Module 2: Health Equity and Social Justice

- Determinants of health inequality
- Access to healthcare in underserved populations

- Structural violence in health systems
- Universal Health Coverage (UHC) ethics
- **Case Study:** Maternal mortality disparities in Sub-Saharan Africa

Module 3: AI and Digital Health Ethics

- AI bias in healthcare algorithms
- Digital surveillance and patient privacy
- Health data governance and cybersecurity
- Ethical telemedicine practices
- **Case Study:** AI diagnostic errors in radiology systems

Module 4: Clinical Research and Trial Ethics

- Informed consent in vulnerable populations
- Ethical approval processes in clinical trials
- Placebo use and ethical controversies
- Research misconduct and integrity
- **Case Study:** COVID-19 vaccine trial ethics in multiple countries

Module 5: Vaccine Ethics and Global Distribution

- Vaccine nationalism vs global equity
- COVAX and international distribution systems
- Prioritization frameworks
- Public trust and vaccine hesitancy
- **Case Study:** COVID-19 vaccine inequity between high- and low-income countries

Module 6: Humanitarian and Disaster Ethics

- Ethics in emergency response
- Resource allocation during crises
- Refugee and migrant health rights
- Conflict zone healthcare ethics
- **Case Study:** Syrian refugee healthcare access crisis

Module 7: Environmental and Climate Health Ethics

- Climate justice and health impacts
- Pollution and vulnerable populations
- Sustainability in healthcare systems
- Ethical responsibility of global institutions
- **Case Study:** Climate-related disease outbreaks in coastal regions

Module 8: Global Health Leadership and Policy Ethics

- Ethical leadership in global institutions
- Policy decision-making under uncertainty
- Accountability in global health governance
- Transparency and corruption in healthcare systems
- **Case Study:** WHO pandemic response governance evaluation

Training Methodology

This course employs a participatory and hands-on approach to ensure practical learning, including:

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.
