

Gender in Health Systems Training Course

Professional Development Training Course Outline

Category	Gender Studies	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

Gender equity and responsiveness in health systems are critical to achieving universal health coverage, improved health outcomes, and sustainable development goals. This course equips health professionals, policymakers, and development practitioners with essential knowledge and skills to integrate gender considerations into health system design, policy, and service delivery. Using evidence-based approaches, participants will explore the intersection of gender, social determinants of health, and healthcare access, while building strategies to eliminate disparities and foster inclusivity.

Gender in Health Systems Training Course leverages practical case studies, participatory learning methods, and cutting-edge research to ensure participants can effectively analyze, plan, and implement gender-responsive health interventions. By the end of the course, participants will be prepared to lead transformative initiatives in health policy, governance, workforce development, and service delivery, ensuring equitable health outcomes for all genders.

Programme Curriculum

Gender in Health Systems Training Course

Introduction

Gender equity and responsiveness in health systems are critical to achieving universal health coverage, improved health outcomes, and sustainable development goals. This course equips health professionals, policymakers, and development practitioners with essential knowledge and skills to integrate gender considerations into health system design, policy, and service delivery. Using evidence-based approaches, participants will explore the intersection of gender, social determinants of health, and healthcare access, while building strategies to eliminate disparities and foster inclusivity.

Gender in Health Systems Training Course leverages practical case studies, participatory learning methods, and cutting-edge research to ensure participants can effectively analyze, plan, and implement gender-

responsive health interventions. By the end of the course, participants will be prepared to lead transformative initiatives in health policy, governance, workforce development, and service delivery, ensuring equitable health outcomes for all genders.

Course Duration

5 days

Course Objectives

By the end of this course, participants will be able to:

1. Analyze gender disparities in health systems using data-driven approaches.
2. Integrate gender equity strategies into health policy and governance.
3. Apply gender-responsive planning for healthcare programs.
4. Enhance women's and men's access to quality healthcare services.
5. Promote gender-sensitive workforce development in health systems.
6. Identify social determinants affecting health outcomes across genders.
7. Strengthen health financing mechanisms for gender equity.
8. Utilize gender-based monitoring and evaluation frameworks.
9. Advocate for inclusive health policies at national and community levels.
10. Develop culturally responsive interventions to address gender barriers.
11. Apply intersectional approaches considering age, ethnicity, and socioeconomic status.
12. Build capacity for gender mainstreaming in emergency and crisis health responses.
13. Leverage technology and digital health innovations for equitable health service delivery.

Target Audience

1. Health policymakers and administrators
2. Healthcare providers and clinicians
3. Public health officers and managers
4. NGO and development practitioners
5. Health researchers and academicians
6. Gender specialists in health
7. Community health advocates
8. Students of public health and gender studies

Course Modules

Module 1: Introduction to Gender in Health Systems

- Understanding gender concepts and frameworks
