### Course Introduction

The Health Workforce Management Training Course is a cutting-edge, competency-based program designed to strengthen health system efficiency, workforce optimization, digital HR analytics, and healthcare service delivery performance. In today's rapidly evolving global health landscape, healthcare institutions face increasing pressure to manage staff shortages, burnout, workforce distribution gaps, and performance inefficiencies. Health Workforce Management Training Course equips participants with advanced skills in strategic workforce planning, HR information systems (HRIS), data-driven decision-making, and healthcare human resource optimization to ensure resilient and high-performing health systems.

With the growing adoption of digital health transformation, AI-powered workforce analytics, and evidence-based HR management in healthcare, this course empowers health managers, HR professionals, and policymakers to align workforce capacity with patient care demands. Participants will gain practical knowledge in recruitment and retention strategies, task shifting, performance management, and leadership in healthcare systems. The program emphasizes real-world applications, global best practices, and case-driven learning to enhance health workforce sustainability, Universal Health Coverage (UHC) readiness, and operational excellence in healthcare institutions.

### Programme Curriculum

#### Health Workforce Management Training Course

##### Introduction

The Health Workforce Management Training Course is a cutting-edge, competency-based program designed to strengthen health system efficiency, workforce optimization, digital HR analytics, and healthcare service delivery performance. In today's rapidly evolving global health landscape, healthcare institutions face increasing pressure to manage staff shortages, burnout, workforce distribution gaps, and performance inefficiencies.

Health Workforce Management Training Course equips participants with advanced skills in strategic workforce planning, HR information systems (HRIS), data-driven decision-making, and healthcare human resource optimization to ensure resilient and high-performing health systems.

With the growing adoption of digital health transformation, AI-powered workforce analytics, and evidence-based HR management in healthcare, this course empowers health managers, HR professionals, and policymakers to align workforce capacity with patient care demands. Participants will gain practical knowledge in recruitment and retention strategies, task shifting, performance management, and leadership in healthcare systems. The program emphasizes real-world applications, global best practices, and case-driven learning to enhance health workforce sustainability, Universal Health Coverage (UHC) readiness, and operational excellence in healthcare institutions.
