ISO 41001:2018 Facility Management Systems Training Course

Professional Development Training Course Outline

Category	Quality Assurance and ISO standards	**Duration**	5 Days
Base Fee	$1,500 USD	**Delivery Mode**	Online / On-site Hybrid

Course Introduction

ISO 41001:2018 Facility Management Systems Training Course is designed to provide comprehensive knowledge and practical skills required to implement, manage, and audit facility management systems effectively. Facility management is increasingly recognized as a strategic discipline that supports the core business, ensuring improved efficiency, compliance, and sustainability. This course focuses on global best practices, risk management, performance improvement, and integration of facility management with organizational objectives. By mastering these skills, participants will gain expertise in managing resources, infrastructure, people, and processes aligned with the ISO 41001 framework.

The training provides participants with the competencies required to align facility management strategies with international standards. It addresses critical aspects such as leadership, operational planning, lifecycle management, sustainability, and continuous improvement. Real-world case studies, interactive discussions, and practical scenarios will ensure participants acquire both theoretical knowledge and hands-on skills to enhance organizational performance. This course will equip professionals with the confidence to implement ISO 41001:2018 in diverse industries while contributing to long-term resilience and value creation.

- Establishing facility objectives and processes
- Risk-based thinking in FM planning
- Identification of resources and competencies
- Strategic and tactical planning approaches
- Documentation of FM plans and policies
- Case study: Strategic FM planning in healthcare

Module 5: Support and Resources in FM Systems

- Workforce competency and training requirements
- Communication strategies in FM systems
- Documentation and information management
- Facilities resources and infrastructure support
- Awareness and stakeholder engagement
- Case study: Communication breakdown in FM operations

Module 6: Operational Control in FM

- Core FM processes and activities

- Outsourcing and supplier management
- Emergency preparedness and response planning
- Compliance with legal and regulatory requirements
- Lifecycle management of facilities assets
- Case study: Operational challenges in higher education facilities

Module 7: Performance Evaluation in FM Systems

- Monitoring and measuring FM performance
- Internal audits and corrective actions
- Management review and continual improvement
- Data-driven decision-making processes
- Benchmarking facility performance indicators
- Case study: FM performance metrics in retail sector

Module 8: Certification and Continual Improvement

- ISO 41001 certification process explained
- Preparing for third-party audits
- Continuous improvement strategies in FM
- Global best practices in FM benchmarking
- Leveraging technology in FM improvement
- Case study: ISO 41001 certification journey in manufacturing

Training Methodology

- Instructor-led interactive lectures
- Real-world case studies and group discussions
- Practical workshops and role-playing exercises
- Hands-on documentation and compliance practice
- Continuous assessments and feedback sessions
