

Mine Dilution Control Training Course

Professional Development Training Course Outline

Category	General Training	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

The Mine Dilution Control Training Course is designed to equip mining professionals with advanced strategies, digital technologies, and operational best practices to minimize ore dilution, improve grade control, and maximize mine profitability. In today's competitive mining environment, where operational efficiency, ESG compliance, sustainable mining, and cost optimization are critical, dilution control has become one of the most important drivers of mine performance. This course integrates modern concepts such as Smart Mining, Digital Mine Optimization, Data-Driven Decision Making, Lean Mining, Real-Time Grade Control, Predictive Analytics, Operational Excellence, and Resource Recovery Optimization to help mining operations achieve higher productivity and reduced ore loss.

Participants will gain practical knowledge in identifying dilution sources, implementing effective blast design, controlling excavation boundaries, improving geotechnical stability, and utilizing modern mining technologies including AI-driven mine planning, drone surveying, 3D geological modeling, automation systems, geospatial analytics, and digital twin applications. Through practical case studies from underground and open-pit mining operations, attendees will develop actionable skills to enhance production accuracy, reduce operational waste, improve safety performance, and increase return on investment (ROI). The course is ideal for organizations seeking to strengthen operational sustainability, increase ore recovery, and improve overall mining value chain performance.

Programme Curriculum

Mine Dilution Control Training Course

Introduction

The Mine Dilution Control Training Course is designed to equip mining professionals with advanced strategies, digital technologies, and operational best practices to minimize ore dilution, improve grade control, and maximize mine profitability. In today's competitive mining environment, where operational efficiency, ESG

compliance, sustainable mining, and cost optimization are critical, dilution control has become one of the most important drivers of mine performance. This course integrates modern concepts such as Smart Mining, Digital Mine Optimization, Data-Driven Decision Making, Lean Mining, Real-Time Grade Control, Predictive Analytics, Operational Excellence, and Resource Recovery Optimization to help mining operations achieve higher productivity and reduced ore loss.

Participants will gain practical knowledge in identifying dilution sources, implementing effective blast design, controlling excavation boundaries, improving geotechnical stability, and utilizing modern mining technologies including AI-driven mine planning, drone surveying, 3D geological modeling, automation systems, geospatial analytics, and digital twin applications. Through practical case studies from underground and open-pit mining operations, attendees will develop actionable skills to enhance production accuracy, reduce operational waste, improve safety performance, and increase return on investment (ROI). The course is ideal for organizations seeking to strengthen operational sustainability, increase ore recovery, and improve overall mining value chain performance.

Course Duration

5 days

Course Objectives

1. Understand the principles and economic impact of Mine Dilution Management
2. Apply Advanced Grade Control Techniques for improved ore recovery
3. Implement Digital Mining Technologies for real-time dilution monitoring
4. Enhance Operational Efficiency and Cost Reduction Strategies
5. Improve Drill and Blast Optimization to minimize overbreak and ore loss
6. Develop effective Geotechnical Risk Management systems
7. Utilize 3D Geological Modeling and Mine Planning Software
8. Apply AI and Predictive Analytics in Mining Operations
9. Strengthen Ore-Waste Boundary Control Techniques
10. Improve Mine Productivity and Resource Optimization
11. Integrate Sustainable Mining and ESG Best Practices
12. Enhance Data-Driven Decision Making in mining environments
13. Develop practical strategies for Continuous Improvement and Operational Excellence

Target Audience

1. Mine Managers
2. Mining Engineers
3. Geologists and Grade Control Engineers
4. Drill and Blast Engineers
5. Production Supervisors
6. Geotechnical Engineers
7. Mineral Resource Managers
8. Operations and Technical Services Personnel

Course Modules

Module 1: Fundamentals of Mine Dilution Control

- Introduction to mine dilution concepts

- Types and causes of ore dilution
- Economic impact of dilution on mining operations
- Dilution measurement and reporting techniques
- Industry benchmarks and performance indicators
- **Case Study:** Underground gold mine dilution reduction project

Module 2: Grade Control and Ore Boundary Management

- Grade control methodologies
- Sampling and assay quality management
- Ore-waste boundary identification
- Real-time grade monitoring systems
- Reconciliation and production accuracy
- **Case Study:** Open-pit copper mine grade control optimization

Module 3: Drill and Blast Optimization

- Blast design principles
- Controlled blasting techniques
- Overbreak and underbreak management
- Fragmentation analysis and optimization
- Blast monitoring technologies
- **Case Study:** Drill and blast improvement in hard rock mining

Module 4: Geotechnical and Ground Control Management

- Rock mass behavior and stability
- Geotechnical risk assessment
- Ground support optimization
- Stope design and stability analysis
- Slope stability monitoring
- **Case Study:** Ground control improvement in underground mining

Module 5: Mine Planning and Digital Technologies

- Short-term and long-term mine planning
- 3D geological and block modeling
- Digital twin applications in mining
- Drone mapping and geospatial analytics
- Mine automation and smart mining systems
- **Case Study:** Digital mine transformation project

Module 6: Operational Excellence and Lean Mining

- Lean mining principles
- Waste reduction strategies
- Productivity improvement techniques
- Continuous improvement systems
- Performance management and KPIs
- **Case Study:** Lean mining implementation in platinum operations

Module 7: Data Analytics and Predictive Mining Solutions

- Mining data management systems
- Predictive analytics applications
- AI-driven operational optimization
- Real-time monitoring dashboards
- Decision-support systems
- **Case Study:** AI-based dilution prediction model

Module 8: Sustainable Mining and ESG Integration

- Sustainable mining practices
- Environmental impact reduction
- ESG compliance frameworks
- Resource conservation strategies
- Responsible mining and stakeholder engagement
- **Case Study:** ESG-driven operational optimization project

Training Methodology

This course employs a participatory and hands-on approach to ensure practical learning, including:

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

Register as a group from 3 participants for a Discount

Send us an email: info@fineskilltrainingcenter.org or call +254769199797

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- a. The participant must be conversant with English.
- b. Upon completion of training the participant will be issued with an Authorized Training Certificate
- c. Course duration is flexible and the contents can be modified to fit any number of days.

- d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- e. One-year post-training support Consultation and Coaching provided after the course.
- f. Payment should be done at least a week before commence of the training, to Fineskill Training Center account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
21 Sep 2026	25 Sep 2026	Online	\$1,000
21 Sep 2026	25 Sep 2026	Physical	\$1,500
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
