Oracle Fusion Supply Chain Management (SCM) Training Course

Professional Development Training Course Outline

Category	Enterprise Resource Planning (ERP)	**Duration**	5 Days
Base Fee	$1,500 USD	**Delivery Mode**	Online / On-site Hybrid

Course Introduction

Oracle Fusion Supply Chain Management (SCM) is a leading cloud-based solution that empowers organizations to streamline their supply chain operations, enhance collaboration, and optimize end-to-end business processes. With real-time analytics, AI-driven insights, and automation capabilities, Oracle Fusion SCM enables companies to respond swiftly to market dynamics, improve operational efficiency, and reduce costs. Oracle Fusion Supply Chain Management (SCM) Training Course is designed to equip professionals with the hands-on skills and strategic understanding required to implement and manage Oracle Fusion SCM effectively.

In today’s competitive business environment, supply chains are more complex than ever, demanding integration across procurement, manufacturing, logistics, and order management. Our comprehensive training provides practical exposure to Oracle Fusion SCM modules, industry best practices, and real-life case studies, enabling participants to leverage digital transformation for operational excellence. By combining conceptual knowledge with scenario-based learning, professionals will gain the confidence to implement Oracle Fusion SCM solutions, drive efficiency, and support strategic decision-making.

Oracle Fusion Supply Chain Management (SCM) Training Course

Introduction

Oracle Fusion Supply Chain Management (SCM) is a leading cloud-based solution that empowers organizations to streamline their supply chain operations, enhance collaboration, and optimize end-to-end business processes. With real-time analytics, AI-driven insights, and automation capabilities, Oracle Fusion SCM enables companies to respond swiftly to market dynamics, improve operational efficiency, and reduce

costs. Oracle Fusion Supply Chain Management (SCM) Training Course is designed to equip professionals with the hands-on skills and strategic understanding required to implement and manage Oracle Fusion SCM effectively.

In today's competitive business environment, supply chains are more complex than ever, demanding integration across procurement, manufacturing, logistics, and order management. Our comprehensive training provides practical exposure to Oracle Fusion SCM modules, industry best practices, and real-life case studies, enabling participants to leverage digital transformation for operational excellence. By combining conceptual knowledge with scenario-based learning, professionals will gain the confidence to implement Oracle Fusion SCM solutions, drive efficiency, and support strategic decision-making.

Course Duration

5 days

Course Objectives

By the end of this training, participants will be able to:

1. Implement and configure Oracle Fusion Supply Chain Management modules effectively.
2. Optimize procurement and sourcing processes with automation and AI-driven analytics.
3. Manage inventory, warehouse operations, and logistics efficiently using Oracle Fusion SCM.
4. Streamline order management and fulfillment processes for faster customer delivery.
5. Integrate manufacturing operations with SCM for end-to-end process visibility.
6. Leverage cloud-based dashboards and reporting for real-time decision-making.
7. Apply best practices in supply chain planning, demand forecasting, and replenishment.
8. Ensure compliance and risk management across the supply chain ecosystem.
9. Enhance collaboration with suppliers, partners, and internal teams using Oracle SCM tools.
10. Utilize IoT and predictive analytics to anticipate supply chain disruptions.
11. Analyze supply chain performance using KPIs and reporting metrics.
12. Apply automation tools to reduce operational costs and increase efficiency.
13. Prepare for Oracle Fusion SCM certification and industry-recognized skill validation.

Target Audience

1. Supply Chain Managers
2. Procurement Professionals
3. Inventory and Warehouse Managers
4. Logistics and Distribution Coordinators
5. Production and Manufacturing Supervisors
6. IT Professionals supporting SCM implementations
7. Business Analysts in supply chain operations
8. Consultants aiming to specialize in Oracle Fusion SCM

Course Modules

Module 1: Introduction to Oracle Fusion SCM

- Overview of Oracle Cloud SCM architecture
- Key modules and functionalities
- Benefits of cloud-based supply chain solutions
- Case study: Implementation in a retail supply chain

- Understanding SCM integration with ERP and Finance

Module 2: Procurement and Sourcing

- Supplier management and supplier collaboration
- Purchase agreements and requisitions
- Automated procurement workflows
- Analytics for supplier performance
- Case study: Reducing procurement cycle time in manufacturing

Module 3: Inventory Management

- Inventory organization and control methods
- Cycle counting and stock replenishment
- Lot and serial number tracking
- Real-time inventory reporting
- Case study: Optimizing warehouse inventory in e-commerce

Module 4: Order Management

- Sales order creation and processing
- Pricing, discounts, and fulfillment rules
- Order orchestration and scheduling
- Returns and customer service integration
- Case study: Enhancing order fulfillment in retail logistics

Module 5: Manufacturing Operations

- Production planning and scheduling
- Work orders and shop floor execution
- Quality management in manufacturing
- Integration with procurement and inventory
- Case study: Implementing lean manufacturing with Oracle SCM

Module 6: Supply Chain Planning

- Demand forecasting and planning strategies
- Supply planning and replenishment methods
- Collaborative planning with suppliers and partners
- KPI tracking and scenario analysis
- Case study: Forecasting demand for seasonal products

Module 7: Logistics and Transportation

- Shipment planning and tracking
- Freight and transportation management
- Warehouse-to-customer logistics
- Real-time supply chain visibility
- Case study: Streamlining global logistics in FMCG

Module 8: Analytics and Reporting

- Dashboards and real-time monitoring

- KPI reporting and actionable insights
- Predictive analytics for supply chain risks
- IoT integration for operational visibility
- Case study: Using analytics to reduce lead times in distribution

Training Methodology

This course employs a participatory and hands-on approach to ensure practical learning, including:

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.
