

Quarry Blasting Techniques Training Course

Professional Development Training Course Outline

Category	General Training	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

Quarry Blasting Techniques Training Course is designed to equip learners with advanced knowledge in drilling and blasting operations, rock fragmentation, mine safety compliance, and blast optimization techniques. This training integrates modern practices in explosive engineering, controlled blasting, vibration reduction, and sustainable quarry operations, ensuring participants gain both theoretical understanding and practical insight aligned with global mining and construction standards.

With increasing demand for cost-efficient extraction, environmental sustainability, and precision blasting in quarrying and mining industries, this course prepares professionals to meet modern operational challenges. It emphasizes bench blasting design, flyrock control, burden and spacing calculations, regulatory compliance, and productivity enhancement strategies, making it ideal for engineers, supervisors, and blasting technicians aiming to improve safety, efficiency, and production outcomes.

Programme Curriculum

Quarry Blasting Techniques Training Course

Introduction

Quarry Blasting Techniques Training Course is designed to equip learners with advanced knowledge in drilling and blasting operations, rock fragmentation, mine safety compliance, and blast optimization techniques. This training integrates modern practices in explosive engineering, controlled blasting, vibration reduction, and sustainable quarry operations, ensuring participants gain both theoretical understanding and practical insight aligned with global mining and construction standards.

With increasing demand for cost-efficient extraction, environmental sustainability, and precision blasting in quarrying and mining industries, this course prepares professionals to meet modern operational challenges. It emphasizes bench blasting design, flyrock control, burden and spacing calculations, regulatory compliance, and productivity enhancement strategies, making it ideal for engineers, supervisors, and blasting technicians aiming

to improve safety, efficiency, and production outcomes.

Course Duration

5 days

Course Objectives

1. Understand fundamentals of drilling and blasting technology
2. Apply blast design principles for quarry optimization
3. Improve rock fragmentation efficiency and size control
4. Master explosive selection and handling procedures
5. Implement flyrock and blast vibration control techniques
6. Ensure mine safety and occupational health compliance
7. Optimize burden, spacing, and bench height calculations
8. Reduce operational costs through blast efficiency improvement
9. Enhance productivity using modern blasting analytics
10. Apply environmental sustainability in quarry blasting
11. Interpret geotechnical and rock mass properties
12. Manage regulatory and explosive licensing requirements
13. Develop skills in controlled and precision blasting methods

Target Audience

1. Quarry and mining engineers
2. Blasting supervisors and shotfirers
3. Civil and mining engineering students
4. Drill and blast technicians
5. Site safety officers (HSE professionals)
6. Project and operations managers in mining
7. Government mining inspectors and regulators
8. Construction and infrastructure blasting contractors

Course Modules

Module 1: Introduction to Quarry Blasting Systems

- Overview of **drilling and blasting lifecycle**
- Types of **quarry blasting methods**
- Rock mechanics fundamentals
- Blast terminology and field applications
- Equipment used in quarry drilling operations
- **Case Study:** Limestone quarry productivity improvement through optimized drilling patterns

Module 2: Explosives Engineering & Handling

- Types of industrial explosives
- Safe handling and storage protocols
- Detonation systems and initiation methods
- Explosive energy and performance analysis
- Regulatory handling compliance standards
- **Case Study:** Safety upgrade in granite quarry explosive storage system

Module 3: Blast Design & Pattern Optimization

- Burden, spacing, and bench height design
- Blast hole geometry optimization
- Timing sequences and delay patterns
- Fragmentation prediction models
- Cost vs performance blast design balance
- **Case Study:** Reduction of oversize rock in dolomite quarry through pattern redesign

Module 4: Rock Fragmentation & Material Control

- Fragmentation measurement techniques
- Influence of rock mass characteristics
- Control of boulder formation
- Secondary breaking techniques
- Crushing efficiency improvement
- **Case Study:** Improved crusher throughput in basalt quarry via fragmentation control

Module 5: Vibration, Flyrock & Environmental Control

- Blast-induced vibration analysis
- Air overpressure management
- Flyrock prediction and mitigation
- Environmental compliance standards
- Community impact reduction strategies
- **Case Study:** Urban quarry reducing vibration complaints by 70%

Module 6: Safety Management in Blasting Operations

- Risk assessment and hazard identification
- PPE and site safety protocols
- Emergency response planning
- Blast exclusion zone management
- Legal compliance and auditing
- **Case Study:** Zero-incident blasting campaign in large-scale quarry project

Module 7: Advanced Drilling Technologies & Equipment

- Modern drilling rigs and automation
- Drill pattern accuracy improvement
- Wear and maintenance optimization
- GPS and digital drilling systems
- Productivity enhancement tools
- **Case Study:** Automation-driven drilling efficiency improvement in hard rock quarry

Module 8: Sustainable Quarry Blasting Practices

- Eco-friendly blasting techniques
- Dust and noise reduction methods
- Energy-efficient blasting strategies
- Environmental impact assessments
- ESG compliance in quarry operations

- **Case Study:** Sustainable quarry transformation meeting ISO environmental standards

Training Methodology

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

Register as a group from 3 participants for a Discount

Send us an email: info@fineskilltrainingcenter.org or call +254769199797

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- a. The participant must be conversant with English.
- b. Upon completion of training the participant will be issued with an Authorized Training Certificate
- c. Course duration is flexible and the contents can be modified to fit any number of days.
- d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- e. One-year post-training support Consultation and Coaching provided after the course.
- f. Payment should be done at least a week before commence of the training, to Fineskill Training Center account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
21 Sep 2026	25 Sep 2026	Online	\$1,000
21 Sep 2026	25 Sep 2026	Physical	\$1,500
21 Sep 2026	25 Sep 2026	Physical	\$0

Start Date	End Date	Location	Price
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
