Risk Assessment for Security Threats Training Course

Professional Development Training Course Outline

Category	Criminology	**Duration**	5 Days
Base Fee	$1,500 USD	**Delivery Mode**	Online / On-site Hybrid

Course Introduction

In today’s rapidly evolving global landscape, organizations face a diverse range of security threats that pose serious risks to assets, people, and operations. Training Course on Risk Assessment for Security Threats is designed to equip professionals with the skills to identify, analyze, and mitigate potential threats using industry-proven frameworks. Through practical case studies, interactive modules, and real-time assessments, participants will learn to enhance organizational resilience and ensure business continuity.

This course integrates cybersecurity risk analysis, physical security assessment, strategic threat intelligence, and predictive risk modeling to deliver a comprehensive learning experience. With the surge in cyberattacks, insider threats, and geopolitical instabilities, it's more critical than ever for security professionals to understand how to evaluate vulnerabilities and respond proactively. This training is tailored for both public and private sector professionals who are committed to securing organizational infrastructures.

Programme Curriculum

Risk Assessment for Security Threats Training Course

Introduction

In today’s rapidly evolving global landscape, organizations face a diverse range of security threats that pose serious risks to assets, people, and operations. Risk Assessment for Security Threats Training Course is designed to equip professionals with the skills to identify, analyze, and mitigate potential threats using industry-proven frameworks. Through practical case studies, interactive modules, and real-time assessments, participants will learn to enhance organizational resilience and ensure business continuity.

This course integrates cybersecurity risk analysis, physical security assessment, strategic threat intelligence, and predictive risk modeling to deliver a comprehensive learning experience. With the surge in cyberattacks, insider threats, and

geopolitical instabilities, it's more critical than ever for security professionals to understand how to evaluate vulnerabilities and respond proactively. This training is tailored for both public and private sector professionals who are committed to securing organizational infrastructures.

Course Objectives

1. Understand risk assessment frameworks used in threat analysis.
2. Identify physical and cybersecurity threats to assets and infrastructure.
3. Apply vulnerability assessment tools and techniques.
4. Evaluate threat intelligence reports for actionable insights.
5. Develop a risk management strategy for high-risk environments.
6. Implement incident response plans for various security threats.
7. Conduct security audits to determine organizational preparedness.
8. Use predictive analytics to forecast emerging threats.
9. Perform threat modeling and simulation exercises.
10. Utilize compliance standards like ISO 31000 and NIST.
11. Create business continuity plans aligned with risk findings.
12. Integrate insider threat detection protocols.
13. Report findings with risk mitigation recommendations.

Target Audiences:

1. Security Managers
2. IT Risk Officers
3. Cybersecurity Analysts
4. Compliance Officers
5. Business Continuity Planners
6. Government Security Agencies
7. Infrastructure and Facility Managers
8. Corporate Executives

Course Duration: 5 days

Course Modules

Module 1: Fundamentals of Risk Assessment

- Understanding the core concepts of risk and threat.
- Introduction to ISO 31000 and NIST frameworks.
- Differentiating between risk analysis and risk evaluation.
- Identifying organizational assets and critical systems.
- Using risk matrices and likelihood-impact scoring.
- **Case Study**: Risk assessment at a multinational manufacturing firm.

Module 2: Threat Identification and Intelligence Gathering

- Techniques for threat identification in cyber and physical environments.
- Open-source intelligence (OSINT) and human intelligence (HUMINT).
- Understanding geopolitical and socio-economic threat indicators.
- Integrating AI tools for automated intelligence analysis.
- Categorizing threats: Insider, external, environmental.
- **Case Study**: Intelligence failure and data breach in a retail corporation.

Module 3: Vulnerability Assessment Techniques

- Difference between vulnerabilities and threats.

- Using penetration testing and red teaming.
- Facility walkthroughs and perimeter security checks.
- Cyber vulnerability scanners and patch management.
- Prioritizing vulnerabilities based on risk exposure.
- **Case Study**: Healthcare institution vulnerability assessment.

Module 4: Predictive Risk Modeling and Simulation

- Leveraging machine learning in risk prediction.
- Scenario planning and simulation tools.
- Monte Carlo simulation in security risk contexts.
- Identifying trends and patterns in past threats.
- Forecasting high-risk scenarios.
- **Case Study**: Financial sector threat modeling analysis.

Module 5: Physical and Cybersecurity Integration

- Merging IT security with physical security systems.
- Smart surveillance and access control systems.
- Network segmentation and firewall configuration.
- Real-time threat detection systems.
- Conducting joint cyber-physical penetration testing.
- **Case Study**: Integrated security at a smart logistics hub.

Module 6: Compliance and Governance in Risk Management

- Key regulations: ISO, NIST, GDPR, HIPAA.
- Developing policy and procedural controls.
- Conducting internal and third-party compliance audits.
- Mapping risks to regulatory requirements.
- Training and awareness initiatives for governance.
- **Case Study**: Non-compliance penalties in a global data center.

Module 7: Incident Response and Business Continuity Planning

- Creating a structured incident response framework.
- Defining roles and responsibilities during crises.
- Business impact analysis (BIA) for key functions.
- Developing continuity and disaster recovery plans.
- Post-incident reporting and process improvement.
- **Case Study**: Business continuity success post-cyberattack.

Module 8: Reporting and Risk Communication Strategies

- Crafting executive-level risk assessment reports.
- Using dashboards and visualization tools for decision-making.
- Communicating risk effectively across departments.
- Stakeholder engagement in risk response.
- Aligning communication with organizational culture.
- **Case Study**: Crisis communication strategy at a transportation agency.

Training Methodology

- Interactive instructor-led sessions
- Real-world case study analysis
- Hands-on exercises and simulations

- Group discussions and collaborative workshops
- Assessment quizzes and final evaluation

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

a. The participant must be conversant with English.

b. Upon completion of training the participant will be issued with an Authorized Training Certificate

c. Course duration is flexible and the contents can be modified to fit any number of days.

d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

e. One-year post-training support Consultation and Coaching provided after the course.

f. Payment should be done at least a week before commence of the training, to Fineskill Training Center account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
21 Sep 2026	25 Sep 2026	Online	$1,000
21 Sep 2026	25 Sep 2026	Physical	$1,500
21 Sep 2026	25 Sep 2026	Physical	$0
21 Sep 2026	25 Sep 2026	Physical	$0
21 Sep 2026	25 Sep 2026	Physical	$0
21 Sep 2026	25 Sep 2026	Physical	$0
21 Sep 2026	25 Sep 2026	Physical	$0
21 Sep 2026	25 Sep 2026	Physical	$0
