Training Course on Climate Change and Sustainable Finance for Central Banks

Professional Development Training Course Outline

Category	Climate Change	**Duration**	5 Days
Base Fee	$1,500 USD	**Delivery Mode**	Online / On-site Hybrid

Course Introduction

The growing urgency of climate change and its systemic risks have compelled central banks to rethink their financial frameworks and integrate sustainable finance into their core mandates. Training Course on Climate Change and Sustainable Finance for Central Banks is designed to equip central banks, financial regulators, and economic policymakers with the skills, tools, and frameworks necessary to address climate-related financial risks and promote green finance initiatives. Using cutting-edge research, real-world case studies, and ESG-driven financial tools, participants will gain a nuanced understanding of climate-aligned financial supervision and regulatory innovation.

In the face of escalating global environmental threats, sustainable finance is no longer optional but essential for financial stability. This course combines sustainability science with macroprudential policy, risk modeling, and climate scenario analysis to enable participants to align their institutional policies with net-zero goals. From green bond markets to the integration of climate stress testing in central banking, this course provides actionable insights and practical strategies for sustainable economic governance.

Training Course on Climate Change and Sustainable Finance for Central Banks

Introduction

The growing urgency of climate change and its systemic risks have compelled central banks to rethink their financial frameworks and integrate sustainable finance into their core mandates. Training Course on Climate Change and Sustainable Finance for Central Banks is designed to equip central banks, financial regulators, and economic policymakers with the skills, tools, and frameworks necessary to address climate-related financial risks and promote green finance initiatives. Using cutting-edge research, real-world case studies, and ESG-driven financial tools, participants will gain a nuanced understanding of climate-aligned financial supervision and regulatory innovation.

In the face of escalating global environmental threats, sustainable finance is no longer optional but essential for financial stability. This course combines sustainability science with macroprudential policy, risk modeling, and climate scenario analysis to enable participants to align their institutional policies with net-zero goals. From green bond markets to the integration of climate stress testing in central banking, this course provides actionable insights and practical strategies for sustainable economic governance.

Course Objectives

1. Understand the economic implications of climate change on monetary and financial stability
2. Identify climate-related financial risks and opportunities for central banks
3. Analyze global frameworks such as the Paris Agreement and NGFS Guidelines
4. Integrate ESG (Environmental, Social, Governance) factors into monetary policy
5. Learn sustainable finance taxonomy and classification systems
6. Implement climate scenario analysis and stress testing methodologies
7. Understand the role of central banks in mobilizing green finance
8. Examine transition and physical risks to the financial system
9. Develop green investment strategies and regulatory frameworks
10. Align central banking with sustainable development goals (SDGs)
11. Leverage public-private partnerships for climate-resilient finance
12. Utilize fintech and digital tools for sustainable finance innovation
13. Apply climate disclosure and reporting standards in supervision

Target Audience

1. Central bank staff and policy advisors
2. Financial regulators and supervisors
3. Monetary policy analysts
4. Economists and risk managers
5. ESG and sustainable finance officers
6. Treasury and fiscal policy experts
7. International development finance institutions
8. Academia and researchers in environmental economics

Course Duration: 5 days

Course Modules

Module 1: Introduction to Climate Change & Central Banking

- Overview of climate science and global warming trends
- Role of central banks in addressing climate change
- Interlinkages between financial systems and climate risk
- Understanding climate-related financial disclosures
- Key global initiatives: Paris Agreement, IPCC, NGFS
- **Case Study:** ECB's Climate Agenda and Policy Integration

Module 2: Climate-Related Financial Risks

- Identifying physical vs. transition risks
- Sectoral vulnerabilities and systemic risk mapping
- Climate risk materiality in asset portfolios
- Tools for climate risk identification and reporting
- Financial risk and resilience frameworks
- **Case Study:** Bank of England Climate Stress Testing
