Programme Curriculum

Training Course on Nutritional Aspects of Infectious Diseases

Training Course on **Nutritional Aspects of Infectious Diseases** is designed for health professionals seeking to enhance their understanding of the critical link between nutrition and infectious diseases. This course explores how nutritional status influences susceptibility to infections and impacts recovery outcomes. Participants will learn how specific nutrients play a vital role in immune function and how malnutrition can increase vulnerability to infectious diseases. By integrating nutritional science with public health strategies, this course aims to equip professionals with the knowledge to develop effective interventions that improve health outcomes in at-risk populations.

In an era where infectious diseases are a major global health challenge, understanding the role of nutrition is more crucial than ever. This course provides a comprehensive overview of the interplay between dietary habits and infectious disease dynamics. Through interactive workshops, real-world case studies, and practical exercises, attendees will gain hands-on experience in assessing nutritional needs and implementing strategies that address malnutrition in the context of infectious disease prevention and management.

Course Objectives

1. Understand the relationship between nutrition and immune function.
2. Analyze the impact of malnutrition on infectious disease susceptibility.
3. Identify key nutrients essential for immune support.
4. Develop dietary interventions for high-risk populations.

5. Evaluate the role of nutrition in disease recovery and management.
6. Implement community-based nutrition programs to combat infections.
7. Assess nutritional status using practical tools and methods.
8. Communicate nutritional guidelines effectively to stakeholders.
9. Explore global nutritional challenges related to infectious diseases.
10. Integrate dietary assessments into public health strategies.
11. Identify emerging research trends in nutrition and infectious diseases.
12. Collaborate with multidisciplinary teams for comprehensive care.
13. Advocate for policies that promote nutrition in health programs.

Target Audience

1. Public health professionals
2. Nutritionists and dietitians
3. Healthcare providers
4. Epidemiologists
5. Community health workers
6. Medical students
7. Policy makers
8. Researchers in health sciences

Course Duration: 10 Days

Course Modules

Module 1: Introduction to Nutrition and Infectious Diseases

- Overview of nutrition's role in public health
- Key concepts in infectious diseases
- Importance of nutrition in disease prevention
- Historical context of nutrition and health
- Current trends in nutritional research.

Module 2: Immune Function and Nutrition

- Understanding immune system components
- Role of vitamins and minerals in immunity
- Nutritional deficiencies and immune response
- Effects of malnutrition on infection outcomes
- Case studies on immune health and nutrition

Module 3: Nutritional Assessment Techniques

- Methods for assessing nutritional status
- Dietary recall and food frequency questionnaires
- Biochemical markers of nutrition
- Clinical assessment techniques
- Interpreting nutritional data for public health

Module 4: Dietary Interventions for Infection Prevention

- Designing effective nutrition programs

- Targeting high-risk populations
- Role of supplementation in disease prevention
- Community-based dietary interventions
- Evaluating intervention effectiveness

Module 5: Nutrition in Disease Recovery

- Nutritional needs during illness
- Impact of nutrition on recovery rates
- Case management in nutritional rehabilitation
- Nutrition education for patients and families
- Monitoring recovery through dietary intake

Module 6: Global Perspectives on Nutrition and Health

- Overview of global nutritional challenges
- Case studies from diverse populations
- Strategies for addressing malnutrition globally
- Role of international organizations in nutrition
- Advocacy for global nutrition policies

Module 7: Collaboration and Communication in Nutrition

- Building multidisciplinary teams
- Effective communication strategies
- Engaging stakeholders in nutrition programs
- Case studies on successful collaborations
- Tools for community engagement

Module 8: Future Trends and Research in Nutrition

- Emerging research in nutrition and infectious diseases
- Innovative dietary approaches to health
- Policy implications for public health nutrition
- Future challenges in nutrition interventions
- Integrating research into practice

Module 9: Nutrition and Specific Infectious Diseases

- HIV/AIDS and nutrition
- Tuberculosis and nutrition
- Malaria and nutrition
- Diarrheal diseases and nutrition
- Respiratory infections and nutrition
- Overview of nutritional needs for each disease

Module 10: Nutrition in Special Populations

- Maternal and child nutrition
- Nutrition for the elderly
- Nutrition in immunocompromised individuals
- Nutrition support for critically ill patients

- Dietary considerations for chronic diseases

Module 11: Food Security and Infectious Diseases

- Impact of food insecurity on disease vulnerability
- Sustainable food systems and health
- Addressing malnutrition through agriculture
- Initiatives to improve food access and affordability
- Case studies from food-insecure regions

Module 12: Program Design and Evaluation

- Needs assessment for nutrition interventions
- Designing culturally-appropriate programs
- Monitoring and evaluation frameworks
- Cost-effectiveness analysis of programs
- Scaling up successful nutrition initiatives
- Ensuring program sustainability

Training Methodology

- **Interactive Workshops:** Facilitated discussions, group exercises, and problem-solving activities.
- **Practical Demonstrations:** Hands-on experience with strategic planning tools and techniques.
- **Case Studies:** Real-world examples to illustrate effective strategic management practices.
- **Role-Playing and Simulations:** Practice decision-making in realistic strategic scenarios.
- **Expert Presentations:** Insights from experienced strategic leaders and consultants.
- **Group Projects:** Collaborative development of strategic plans for participants' organizations.
- **Action Planning:** Development of personalized action plans for implementing learned practices.
- **Digital Tools and Resources:** Utilization of online platforms and applications for strategic management.
- **Peer-to-Peer Learning:** Pairing experienced managers with those new to strategic planning.
- **Post-Training Support:** Access to online forums, mentorship, and continued learning resources.

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- Participants must be conversant in English.
- Upon completion of training, participants will receive an Authorized Training Certificate.
- The course duration is flexible and can be modified to fit any number of days.
- Course fee includes facilitation, training materials, 2 coffee breaks, buffet lunch, and a Certificate upon successful completion.
- One-year post-training support, consultation, and coaching provided after the course.
- Payment should be made at least a week before the training commencement to Fineskill Training Center account, as indicated in the invoice, to enable better preparation.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
23 Nov 2026	04 Dec 2026	Online	$2,000
23 Nov 2026	04 Dec 2026	Physical	$3,000
23 Nov 2026	04 Dec 2026	Physical	$6,000
23 Nov 2026	04 Dec 2026	Physical	$6,000
23 Nov 2026	04 Dec 2026	Physical	$12,000
23 Nov 2026	04 Dec 2026	Physical	$9,000
23 Nov 2026	04 Dec 2026	Physical	$12,000
23 Nov 2026	04 Dec 2026	Physical	$12,000
